PROFILE

Full Stack Developer with 8+ years of experience specializing in Ruby on Rails and React. Proven track record of building scalable, high-performance web applications with clean, maintainable code. Strong team leader focused on delivering user-centric solutions using modern technologies.

SKILLS

Technical: Ruby, Ruby on Rails, PostgreSQL, Turbo, Stimulus, Hotwire, View Components, React, Mysql, MongoDB, Sidekiq, Redis, RESTful API, GraphQL, Test Driven Development, Postman, HTML/CSS, JavaScript, jQuery, Capybara, Rspec, Docker, CICD, Jenkins, Unit Testing,

Tools: AWS (S3, EC2), Github, Heroku, Jira, Trello, Gitlab, bitbucket, Digital Ocean

EXPERIENCE

Bestpeers Infosystem Pvt. Ltd.

Indore, India

Sr. Ruby on Rails Developer

07/2025– Present

- Collaborated with clients across diverse industries to develop web applications using Ruby on Rails and React.
- Managed all phases of development from requirement gathering and UI/UX design to deployment and maintenance.
- Built end-to-end scalable applications with robust backend logic and engaging front-end interfaces.

Gems Essence Infotech Pvt. Ltd

Indore, India

Sr. Ruby on Rails Developer

02/2021– 07/2024

- Led a team of **6 developers**, overseeing task assignments, requirement analysis, and pull request reviews.
- Designed and implemented **RESTful APIs** to enhance application performance and scalability.
- Collaborated with the frontend team to integrate **React-based user interfaces** with backend services.
- Optimized database queries, reducing **API response times by 40%** for large datasets.
- Spearheaded the integration of **third-party APIs**, improving overall application functionality.
- Deployed and managed applications on **AWS** and **Heroku**, ensuring uptime and scalability.

Yuvasoft Solutions Pvt. Ltd

Indore, India

Ruby on Rails Developer

02/2015 – 12/2020

- Developed and maintained **high-performance web applications** using Ruby on Rails.
- Built **responsive, intuitive user interfaces** with Rails and frontend technologies, improving usability and engagement.
- Delivered **scalable and reliable backend systems**, ensuring smooth performance under heavy load.
- Implemented **authentication, authorization**, and other core modules to enhance security and user experience.
- Contributed to continuous integration workflows and applied **test-driven development (TDD)** practices.

PROJECTS

House of student (<https://houseofstudent.com/>)

The platform describes itself as a student-housing marketplace: you can search for accommodation in multiple countries (UK, USA, Canada, Australia, New Zealand etc.).

Deliverables & Responsibilities:

- Begin by engaging with clients to understand their business objectives, pain points, and expected outcomes.

- Collaborate with product owners and project managers during sprint planning to define clear deliverables, timelines, and priorities.
- Design and maintain relational database schemas; write optimized SQL queries and ensure data consistency and performance.
- Develop RESTful APIs and ensure seamless integration with frontend frameworks or third-party services.
- Write RSpec or Minitest unit tests to ensure robust, test-driven development (TDD) and reliable CI/CD pipelines.
- Deploy and monitor applications on cloud environments such as AWS, New Relic, Cloudflare, and Amazon RDS, ensuring high availability, scalability, and optimal performance.

Tools Used:

Ruby on Rails, Reactjs, HTML, CSS, jQuery, PostgreSQL, Sidekiq, Redis, CICD, Github Actions, AWS, New Relic, Cloudflare and Amazon RDS.

Richardson Sales Performance (<https://www.richardson.com/>)

Developed a sales training platform for Richardson Sales Performance to build team capabilities and drive outcome-focused learning.

Deliverables & Responsibilities:

- Begin by meeting with the client and actively listening to their needs, pain points, and goals.
- Engaging with the client to gather detailed requirements, followed by collaborative sprint planning sessions with the project manager to align on priorities, resources, and timelines.
- Designed database schemas, wrote complex queries, and ensured data integrity.
- Develop RESTful or GraphQL APIs and ensure seamless integration with frontend frameworks or third-party services.
- Conducted code reviews, optimized performance, and managed security standards.

Tools Used:

Ruby on Rails, GraphQL, Reactjs, HTML, CSS, jQuery, PostgreSQL, Sidekiq, Redis, CICD, Github Actions

MV Truck Rental (<https://www.mvcommercial.com/>)

MV Commercial is a UK-based provider of specialized commercial vehicles for sale and rental, primarily serving the construction and haulage sectors. The company offers customizable vehicle builds, in-house financing, and 24/7 support, aiming to deliver flexible and scalable fleet solutions.

Deliverables & Responsibilities:

- Created admin panels with role-based access control for client dashboards.
- Designed database schemas, wrote complex queries, and ensured data integrity.
- Optimize application performance and scalability for high-traffic systems.
- Developed multiple restful Api's which performs multiple business logics.
- Integrated third-party APIs and performed data migration.
- Write Rspec for unit testing.

Tools Used:

Ruby, Ruby on Rails, Sidekiq, Javascript, JQuery Docker, Html, Css, Git , Postman , Mysql, AWS

KEY ACHIEVEMENTS

- **Leadership Excellence:** Led a team of 10, increasing productivity by 30%.
- **API Optimization:** Optimized API response times by 40%, improving user experience.
- **API Implementation:** Implemented RESTful APIs, boosting application performance.
- **Database Efficiency:** Led database optimization, enhancing query speed by 35%.

EDUCATION

ITM University

MCA(Master of Computer Application)

Gwalior, India

2011 – 2014
